LES installed two electric vehicle charging stations in the city of Lincoln’s Green 2 parking garage (530 P St.) during the fall of 2014.

Each ChargePoint station has two charging ports, three of which are for public use. The fourth port is reserved for DEC/LES vehicles.

These public charging stations are the first in the City.

The units are Level 2, 240 volt/30 amp chargers (7.2 kilowatts).

There is a $2 flat rate for a charge.

Drivers are requested to limit their use to four hours.

Data gathered from these stations will help LES gauge the demand for electric vehicle charging stations in Lincoln.

Electric vehicle charging at an LES-sponsored station...

_Easily start a four-hour session using:_

- Your ChargePoint card.
- The ChargePoint mobile app.
- A contactless credit card with an RFID chip.
- Or, by calling driver support at 1-888-758-4389. This number is listed on each ChargePoint station and on the back of every ChargePoint card.

_Charging your electric vehicle:_

- After making your $2 payment, press the handle button to remove the charging connector.
- Simply plug in.
- When you are all charged up, tap your card or call to end the session. You may also end a session using the ChargePoint mobile app.
- Unplug the connector and return it to the station.

_ChargePoint is available to assist electric vehicle drivers 24 hours a day, seven days a week at 1.888.758.4389._
