

Energy Answers

Free energy information services to help manage your bottom line on energy costs.

Make your energy dollars work harder for you

LES Energy Answers offers free energy information services that can help you effectively manage the bottom line on your energy costs.

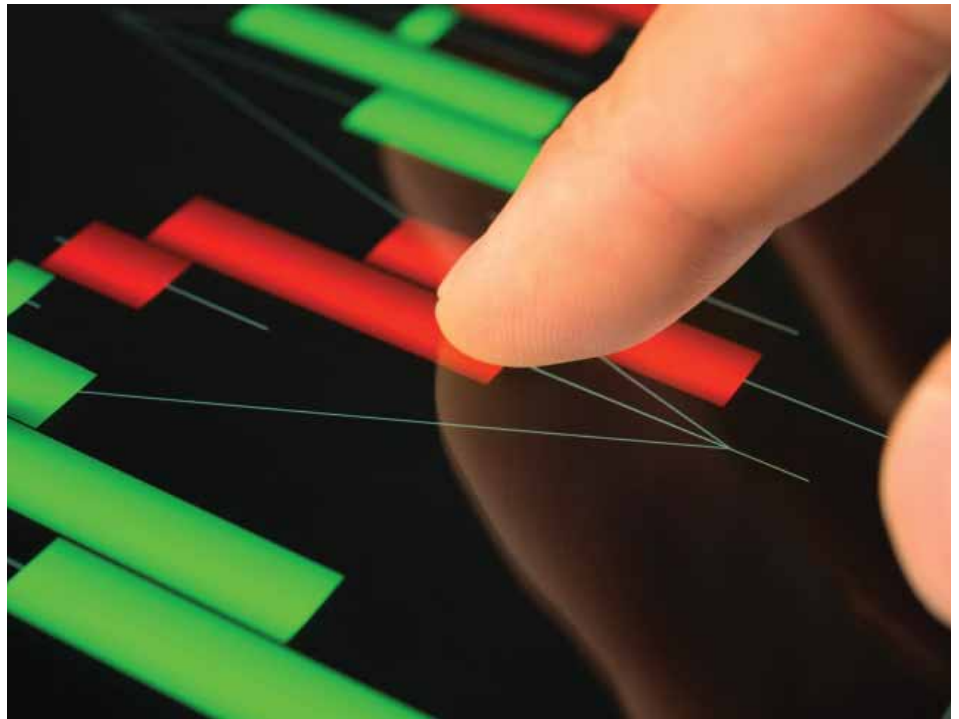

Concerned about energy costs in your offices, plants and warehouses?

Many businesses have saved thousands of dollars in annual energy costs by implementing the no-nonsense, cost-effective, efficiency recommendations provided to them through an LES Energy Efficiency Review. An LES Energy Efficiency Review provides a quick, no-hassle, "walkthrough" energy checkup of your facilities. Trained and experienced LES Energy Services Representatives have conducted walk-through energy checkups for hundreds of Lincoln-area businesses.

We'll evaluate your building insulation, lighting, water and space heating systems, and other energy related equipment. You will receive no-frills recommendations on how to make effective business decisions when improvement or replacement is needed.

How much of my electricity use is related to weather? Can I change the way I use electricity to reduce my costs? Is my LES Service Rate Plan current?

- We can help you analyze past electricity use patterns to determine when and how you use electricity in your business so you can be assured you are minimizing electricity costs and maximizing productivity.
- We can identify the impact of weather on your bills and recommend ways to keep the weather out without costing you a bundle.
- We can show you how to effectively manage and schedule daily and seasonal electric loads to hold the line on costs. We can also analyze the impact of high horsepower motors or multiple electric motor loads and large lighting requirements on your bills.
- As your business grows, the ways you use electricity can change. We can help match an LES Service Rate Plan to your current electricity use profile to ensure that it provides you effective cost management.

Give us a call at **402.475.4211** or visit us online at **www.les.com** to schedule a free LES Energy Answers review for your business. An Energy Services Specialist can work with you to determine which LES Energy Answers services are right for your business.
