

ECONOMIC DEVELOPMENT RIDER

Affordable electricity you can trust

Lincoln Electric System offers an Economic Development Rider to encourage and stimulate commercial and industrial business growth in and around Lincoln, Nebraska.

This Rider provides a benefit to all customers in the service territory by fully utilizing our system's capacity and adding quality load to LES.

Availability

The Rider is available to new Large Light & Power, Large Power Contract and Large Power with Market Energy customers. The Rider is also available to existing customers of these rate classes who are making a significant expansion.

How it Works

- The normal term will be for a period of 10 years.
- Customers that have a monthly load factor of 55% or greater will receive the applicable discount credit on their demand charges for that month: 50% discount year 1, 40% year 2, 30% year 3, 20% year 4 and 10% year 5.
- The credit will be discontinued in year 6, with the customer continuing to take electric service from LES for the next 5 years.
- Different time-frame requests will be considered as long as the customer remains on the system with large-use customer load for an equal number of years as the credit was paid.

Lincoln Electric System's commercial/ industrial rates are some of the lowest around. In fact, your business saves thousands of dollars a year on electricity costs compared to the rest of the country – savings that go straight to your bottom line.

LES' balanced mix of energy sources provides us with flexibility, adaptability and stability in an ever-changing landscape. Our diversified power portfolio helps sustain low rates for our customers, now and in the future.

We take pride in being 99.99% reliable for more than 17 years in a row, and LES' commercial and industrial rates consistently rank among the most affordable in nationwide surveys.
