

PEAK REWARDS

Enroll your smart thermostat and contribute to smarter energy usage – for yourself and our community.

Lincoln Electric System designed the Peak Rewards program to engage customers in helping to lower the Lincoln area's electrical demand and taking better control of their own energy consumption.

Smart thermostats make it simpler to control the amount of energy you use. You can adjust your home's temperature on the fly or develop a customized schedule that keeps you comfortable. Not only can it help you lower your energy costs, but it also provides an easy way to stay in tune with how and when your air conditioner or furnace is running.

Make a meaningful difference by helping lower our community's peak period of electrical demand when you enroll your smart thermostat in Peak Rewards.

Program Incentives

You'll receive a \$25 Prepaid gift card for each eligible device enrolled. Each year you remain enrolled, you'll also receive a \$25 credit on your electric bill after the program year closes Sept. 30.

To enroll, you must:

- Be an LES residential or small commercial customer.
- Use your thermostat to control your central air conditioning.
- Install an eligible internet-connected thermostat.
- Allow LES to make short-term, low-impact thermostat adjustments on days when energy use is high.

HOW IT WORKS

Peak Rewards runs annually June 1–Sept. 30, the period when electric use in Lincoln and the surrounding areas is the highest.

- During the summer, LES will make small adjustments to your thermostat to help lower the electricity demand in our area.
- Depending on your smart thermostat, you'll be informed of the changes through push notifications through your device's online portal or mobile app.
- To ensure your comfort, LES will adjust your thermostat down 3 degrees to pre-cool your home. Once pre-cooling is complete, the temperature will be adjusted up to 4 degrees above the current programmed setting.
- Adjustments will never exceed a shift of more than 3 degrees of the customer programmed temperatures and only occur on on-holiday weekdays. Each adjustment is only temporary – once it's over, your previous setting will return.
- You will experience 15 or fewer adjustments each year.
